I understand that good oral hygiene is essential to prevent decay and to assist in the successful treatment of dental conditions.

- 1. Drugs and Medications: I understand that antibiotics, pain medications, anesthetics and other medications can cause allergic reactions...
2. Fillings: I understand that a more extensive restoration than originally planned may be required due to additional conditions discovered during preparation.
3. Crowns and Bridges: I understand that it is sometimes not possible to exactly match the color of natural teeth with artificial teeth.
4. Dentures: I understand that wearing dentures is not a simple process, that chewing efficiency will be diminished, and that dentures are not "permanent."
5. Changes in Treatment Plan: I understand that it may be necessary during treatment to change or add procedures because of conditions discovered during treatment that were not evident during examination.
